

Long Range Transportation Plan

Public Workshops

You are invited!

The Greensboro Urban Area Metropolitan Planning Organization (MPO) invites you to attend the first round of public workshops for the 2030 Long Range Transportation Plan (LRTP). The purpose of these meetings is to hear from area citizens about future transportation needs and their visions for the future transportation system. **Your input is valuable to the development of the plan!**

Plan Area & Scope:

The planning area includes much of Guilford County, including the City of Greensboro and the Towns of Oak Ridge, Pleasant Garden, Sedalia, Stokesdale, and Summerfield. The MPO involves the City, the County, NCDOT, area Towns, and Triad regional partners in transportation planning for the area.

The plan will: 1) assess future roadway, public transportation, bicycle and pedestrian facility, and rail needs; 2) refine investment strategies in light of anticipated future resource availability and limitations; and 3) address a range of public policy issues regarding the future transportation system.

Upcoming Activities:

The first round of workshops include four meetings spread throughout the area for your convenience. A second round will be held in early 2004, and a third and final round in Spring 2004. Plan adoption is anticipated in Summer 2004. **You are encouraged begin your participation early in the process!**

Who Should Attend?

- Anyone that drives, bikes, walks, or rides public transportation
- Anyone interested in commerce and the movement of goods
- People interested in shaping the future of their community and the transportation system
